

# USC Dornsife Center for Economic and Social Research

**Understanding Coronavirus in America** Tracking Survey – Release Date: April 30, 2020

## Methodology – April 30, 2020, Release

On April 1, 2020, USC's Center for Economic and Social Research (CESR) invited all active members of CESR's Understanding America Study (UAS) probability-based internet panel to participate in an ongoing coronavirus tracking poll.

Each panel member was randomized to respond on a pre-assigned day of the week, distributed so that a full sample is invited to participate over a 14-day period. Respondents have 14 days to complete the survey but receive an extra monetary incentive for completing the survey on the day they are invited to participate. Data for the full sample is thus final after a 28 day period.

Los Angeles County residents answer once a week, alternating between a long form survey which is administered to everyone across the country every two weeks, and a short-form survey administered only to LA County residents every other week. For the subset of long form and short form survey questions that are identical, data for the full LA County sample is final after a 14 day period.

The design creates a sample that is updated daily, shown in corresponding graphs on our tracking poll website [Covid19Pulse.usc.edu](https://Covid19Pulse.usc.edu). These are refreshed just after 3am PST every day of the week. On the site, the viewer can choose to view aggregated results from our national sample, and from our Los Angeles County sub-sample. The graphs may be run for overall results, or among categories of age, race/ethnicity, gender, education, and income, when sample size allows. Results are suppressed for sample sizes less than 100 individuals

We provide the aggregated data used to create the graphics in csv format, and the graphics files themselves are downloadable in several formats. Survey questionnaires, toplines, microdata files, and links to publications are available from our UAS data site at [UASdata.usc.edu](https://UASdata.usc.edu)

### Sample information

Approximately 7,100 adult residents of the U.S. are participating in the ongoing surveys; an average of roughly 550 per day, and more are being added each day. This includes nearly 1,500 residents of L.A. County. Specific sample sizes and sampling error information are provided in individual press release toplines and publications and vary according to the date and type of analysis. Sampling error calculations are at the 95% confidence level. Factors other than sampling error may affect results of any survey, including question wording, question order, mode, sample type, population coverage, and impact of current events.

For more information about the UAS panel, including weighting details; panel sampling procedures; recruitment protocols, survey and recruitment response rates; panel attrition rates; panel management protocols; and microdata files (including nonresponse and paradata), please visit the Understanding America Study website at <https://UASdata.usc.edu>.

### Survey and Data

The full survey wording and question text are provided in this topline release. For most questions, we rotated the order of response options, and/or questions to average out order effects. Respondents participated via computer, mobile device or tablet, at any time of day or night during the field period. The survey was conducted in the respondents' choice of English or Spanish.

Topline reports, codebook, and microdata associated with this release are available to registered UAS users at <https://uasdata.usc.edu/page/COVID-19+Corona+Virus>.

## Survey Weights and Participation Rate

A total of 9063 panel members were invited to participate, including 8,547 panel members who were eligible to be included in the weighted sample. Included in the raw data (available upon request) but excluded from the weighted sample were recruited via listed sample for a specific project.

The method for creating sample weights for the tracking survey follows the general procedure for UAS surveys described [in CESR's online methodology documentation](#). Sample weights are constructed in two steps. First, we calculate a base weight that corrects for unequal probabilities of selection of different households into the UAS. Second, we generate post-stratification weights, which align sample distributions of key demographics, namely gender, race/ethnicity, age, education, and geographic location, with their population counterparts. Population benchmarks are derived from the Basic Monthly Current Population Survey (CPS). The provided sample weights bring the sample in line with the U.S. adult population, if the entire sample is used. The sample weights also provide alignment with the population of Los Angeles County residents, California residents excluding Los Angeles County, and U.S. excluding California, if these geographic sub-samples are selected.

## Panel Information

The UAS is an ongoing national research panel that started in 2014. We recruit panel members in waves from Marketing Systems Group frames of all household addresses in the United States. To ensure full coverage of the U.S. population, we provide internet-connected tablets to households that were not already online. Our panel includes U.S. residents who have cell phones, landlines, or no phone at all. It also includes a small number of respondents recruited from a listed sample, these participants are not included in weighted samples. Panel members are compensated for their participation.

## About the Center for Economic and Social Research

The Center for Economic and Social Research (CESR), part of the USC Dornsife College of Letters, Arts and Sciences, conducts basic and applied research in economics, psychology, demography, education, and sociology. The center's name signifies the breadth of the research, which encompasses numerous disciplines, topics and methodologies. The Center's multi-disciplinary philosophy fosters a productive and innovative research environment focused on understanding and informing important societal issues.

## Survey Team

**Arie Kapteyn** Ph.D., is Professor of Economics and the Executive Director of the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Daniel Bennett** Ph.D., is Assistant Professor (Research) of Economics at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Kyla Thomas** Ph.D., is a Sociologist at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Jill E Darling**, MSHS, is Survey Director for the Understanding America Study at the Center for Economic and Social Research at the University of Southern California.

**Anna Saavedra**, Ed.D., is an Education Research Scientist at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

For questions about this survey, please contact [uas-l@usc.edu](mailto:uas-l@usc.edu)

The USC Dornsife Center for Economic and Social Research is a proud member of the American Association for Public Opinion Research's [Transparency Initiative](#). The survey was funded by the USC Dornsife College of Arts, Letters and Sciences.

Understanding Coronavirus in America Tracking Survey – Release Date: April 30, 2020

## Topline Report – April 30, 2020, Release

**Release date** April 30, 2020

**Survey dates** April 1 through April 15, 2020

**Sample size** 5,477 Adult U.S. Residents, including 1,452 unique households with children in preschool through 12<sup>th</sup> grade

This release represents a summary of selected education-related findings from the overall survey. Full questionnaires, data and other information is available at [UASdata.usc.edu](https://UASdata.usc.edu).

**Sample notes:** Findings from this release are based on a subsample of households with school-aged children. All respondents with children were invited to respond to the survey's child-related questions. Among respondents who belonged to the same household, only the respondent designated as "primary respondent" was included in the analytic subsample. In cases where no "primary respondent" was designated, a random selection of one respondent was made for inclusion in the household subsample.

## National Sample Characteristics

The table below summarizes select characteristics of the full National sample, with and without survey weights.

|                                    | National<br>unweighted | National<br>weighted |
|------------------------------------|------------------------|----------------------|
| Male                               | 42%                    | 48%                  |
| Age(18-34)                         | 19%                    | 24%                  |
| Age(35-54)                         | 37%                    | 38%                  |
| Age(55-64)                         | 20%                    | 18%                  |
| Age(65+)                           | 23%                    | 20%                  |
| Low education (GED)                | 21%                    | 38%                  |
| Medium education (Some College)    | 37%                    | 28%                  |
| High education (College and above) | 42%                    | 34%                  |
| HH income (\$0-24,999)             | 19%                    | 22%                  |
| HH income (\$25,000-49,999)        | 21%                    | 23%                  |
| HH income (\$50,000-74,999)        | 19%                    | 19%                  |
| HH income (\$75,000 and above)     | 40%                    | 36%                  |
| Non-Hispanic White                 | 68%                    | 63%                  |
| Non-Hispanic Black                 | 7%                     | 12%                  |
| Non-Hispanic Asian                 | 5%                     | 5%                   |
| Non-Hispanic Other                 | 5%                     | 4%                   |
| Hispanic/Latino                    | 16%                    | 17%                  |

Please refer to the topline results reported on the following page for question-specific sample sizes and margins of sampling error. All differences among subgroups reported in the media release were tested for statistical significance.

\*Note about coding: Topline results for this release rely on a different coding of race and ethnicity than the coding used to generate the national sample characteristics provided on this page and on our website. For additional information about the particular coding used in this release, please contact [uas-l@usc.edu](mailto:uas-l@usc.edu).

## Topline Tables – April 30, 2020, Release

**Topline Notes:** The topline results reported in the attached document provide univariate statistics and demographic breakdowns for a selection of education-related findings from the overall survey. Breakout categories with fewer than 100 respondents have been suppressed. Full question text can be found in the questionnaires, which are available at <https://uasdata.usc.edu/page/COVID-19+Corona+Virus>.
